

Oscar Sutherland

Looking for part-time jobs, work experience & internships. I already have a work visa

I graduated from Nord Anglia International School Dubai in the 2025/26 academic year, where I completed three A-Levels in Computer Science, Business, and Physics, as well as an EPQ. This reflects my passion for technology and business. I have a strong entrepreneurial mindset, which has led me to seek a role where I can contribute meaningfully while gaining real-world experience.

During my studies, I programmed a chess game for my Computer Science NEA and a puzzle game for my EPQ artefact, which explored the evidence-based advantages of this game genre. This helped me develop my problem-solving, research and project management skills.

Education

Nord Anglia School Dubai

Class of 2026

A-Levels:

- Computer Science
- Physics
- Business

Super-curriculars:

- Extended Project Qualification: "What are the Evidence-Based Advantages of Problem-Solving Video Games?"

Additional Projects & Courses

UE5 Multiplayer Survival Game Course by Smart Poly

Skills

- Self-motivated and independent worker
- Programming: Python, UE Blueprints (C++)
